

Everyday I get in the car, ready to head off to work, when I turn the key something wonderful happens...positive and encouraging messages fill up the air and start my day off right. And it is not just me, many of my friends and co-workers and even strangers start out the same way in my community. And K-LOVE is responsible for this! They are heard on 95.9 and 91.9 in my area. If K-LOVE were to be displaced by an LPFM broadcaster providing other programming it would negatively effect my community. K-LOVE provides such a wonderful service for my community...positive and encouraging music and messages...and such a family-friendly listening environment. We have other stations in this area that I would be embarrassed to listen to them in front of my parents. with the rude and crude humor and encouraging illegal drug use - (one morning show often talks about illegal drug use and makes sounds of the act on the show). Really I do not want to listen to this. I want K-LOVE where the messages and music are uplifting for all. Please consider the FM translator stations and save them!! Thank you.
